CWT – Experienta in tratarea apei

Compania

Christiani Wassertechnik GmbH (CWT) a fost infiintata in 1948 si a ajuns deja la a treia generatie in dezvoltarea solutiilor impotriva depunerilor de calcar si a formarii ruginii.

Produse

Produsele din seria Vulcan ofera sase dimensiuni diferite ale echipamentului si sunt distribuite cu succes de peste 15 ani in domenii diferite cum ar fi industrie si alte sectoare din mediul privat. In plus fata de produsele de serie testate si verificate exista un produs nou pentru clientii finali: noul **calmat®** si **calmat® PLUS**.

Piete de desfacere

CWT a atins cea mai mare cifra de afaceri in Germania. Curand dupa infiintare, compania s-a extins in toata Europa astazi fiind prezenta si in Asia si in America de Nord. In prezent, reseaua de vanzari a companiei CWT acopera peste 40 de tari in toata lumea.

Dear GdR,

Thank you very much for your special attention for "McDonald's Ukraine Ltd".

From our side we're very grateful for your cooperation and support during the 10 years period of time.

Our company began to operate in Ukraine in the year 1997.

And during this period we've already opened 57 restaurants "McDonald's", which is a good result.

In all of these restaurants we installed the equipment by CWT, which is in a good account in Ukrainian Market.

Besides this equipment is easy for installation and very handy in exploitation.

As for me I want to add that support of your company is very important for us.

Best regards,
 Eugene Maslov

Vulcan 1000 Service Report

Dear Sir,

8.06 months ago we installed your Vulcan 1000 water treatment system in our catering services at the Calmat trade fair. In recent years we have had problems in particular with the coffee machines and dishwashers due to the hard water in Cologne. The machines had to be maintained frequently and the cleaning costs of the kitchen were very high.

After the installation of your water treatment system in our kitchen I noticed a clear improvement of the situation. The limescale deposits on the staff. Less detergents satisfied with your device.

Unfortunately I am unable to give a long-term opinion as it is not possible to see inside the filters - limescale inside the pipes and can therefore.

Yours Sincerely,

 GdR, Eschweiler

8. December 2006

Dear Sir,

our Mövenpick Restaurant opened in January 2000. After a short period of time we noticed a high level of limescale developing on the ice-cream makers. These calcifications could only be cleared bit by bit which is a time consuming process. To avoid potential losses a short-term limescale filter was installed. The operating time of this filter is limited however and thus results in high costs.

At a trade fair visit we consulted the company Christiani Wassertechnik GmbH about other possibilities.

We installed the limescale convertor Vulcan 5000 and the ice-cream makers have been functioning smoothly for 10 months now.

The limescale, which accumulates especially in the crushed ice makers, can now be easily removed as it is converted into fine-grained structures.

We wish the company Christiani further success with their excellent products.

Yours Sincerely,
 Marcel Charrier
 Director

calmat[®] – Impotriva depunerilor de calcar si a formarii ruginii

calmat[®] este o solutie economica impotriva depunerilor de calcar si a formarii ruginii, destinata in special domeniului rezidential

- calmat[®] minimizeaza noile depuneri de calcar in conducte
- calmat[®] igienizarea lenta a intregului sistem de conducte
- calmat[®] protectia impotriva coroziunii si a formarii ruginii
- calmat[®] este recomandat pentru orice fel de material al tevi
- calmat[®] scade costurile cu energia; incalzirea apei devine mult mai eficienta

• calmat[®] prelungeste durata de viata a aparatelor electrocasnice

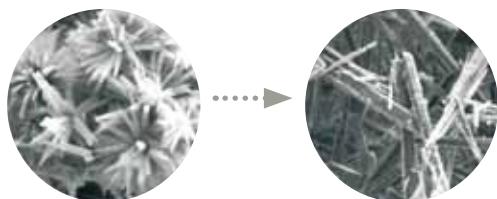

• calmat[®] protejeaza mediul prin micșorarea consumului de detergenți, aditivi și agenți de curățare agresivi

• calmat[®] funcționează eficient pentru apă cu duritate mare

• calmat[®] pentru tevi cu diametrul de maxim 1 1/2"

• calmat[®] PLUS pentru tevi cu diametrul de maxim 3"

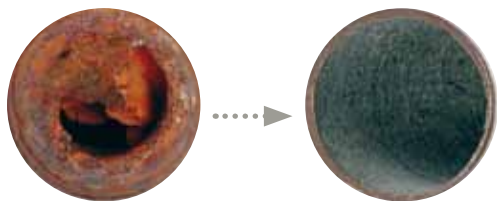

calmat® – Tehnologia

1) **calmat® reduce depunerile de calcar in tevi si in aparatele de uz casnic.** La tratarea apei cu aparatul **calmat®**, sunt emise in apa impulsuri electrice de inalta frecventa, acestea avand rolul de a schimba structura cristalelor de calcar. Dupa tratarea apei, aderenta cristalelor este redusa, astfel incat nu se mai depune calcar in interiorul tevilor.

2) **calmat® igienizeaza lent instalatia.** In timpul procesului natural de cristalizare, depunerile de calcar se formeaza si se desprind simultan datorita acidului carbonic. **calmat®** schimba acest echilibru, astfel incat depunerile existente de calcar sunt indepartate cu ajutorul unui surplus minor de acid carbonic.

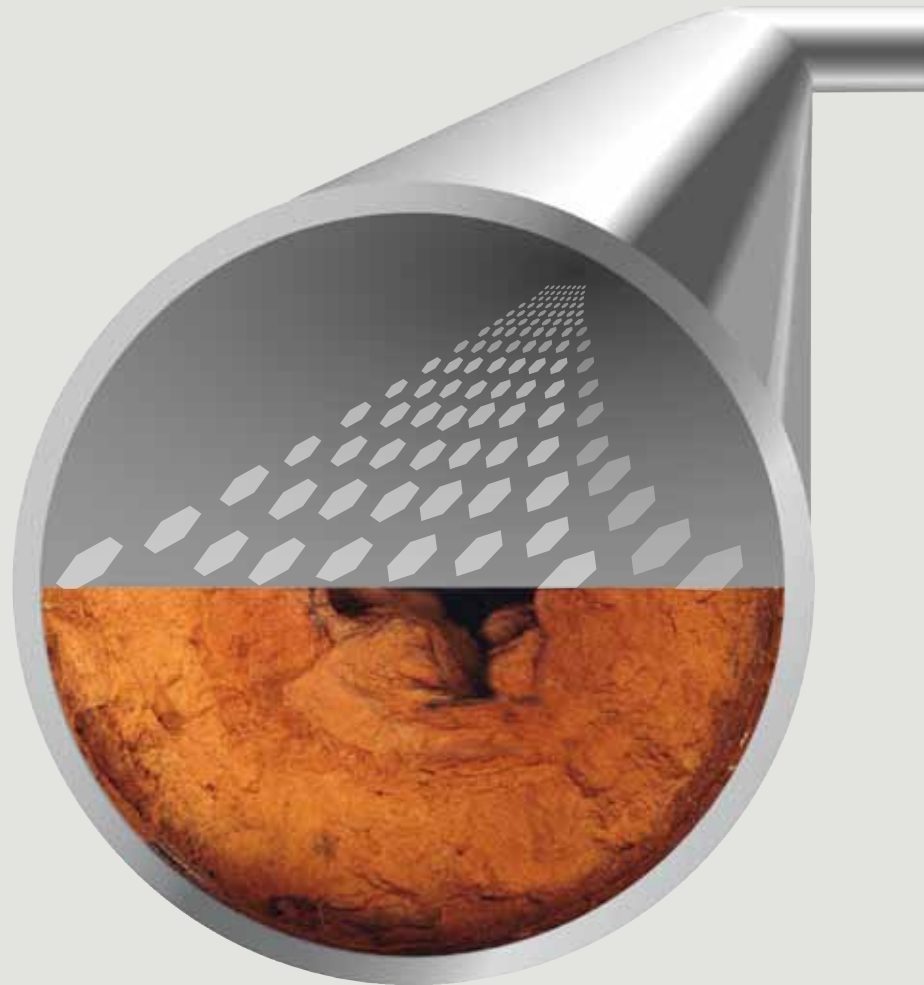

3) **calmat® protejeaza impotriva degradarii datorate ruginii si a coroziunii.** Atunci cand indepartarea depunerilor de calcar este completa, in interiorul tevii metalice se formeaza un strat de carbonat al metalului respectiv. In timp, acest strat protector previne viitoarele corodari.

Avantajele tehnologiei cu impulsuri - calmat®

- **calmat®** functioneaza fara aditivi chimici
- **calmat®** pastreaza in apa mineralele importante
- **calmat®** functioneaza independent de viteza apei
- **calmat®** functioneaza fara campuri magnetice
- **calmat®** functioneaza fara nici un fel de operatii de intretinere

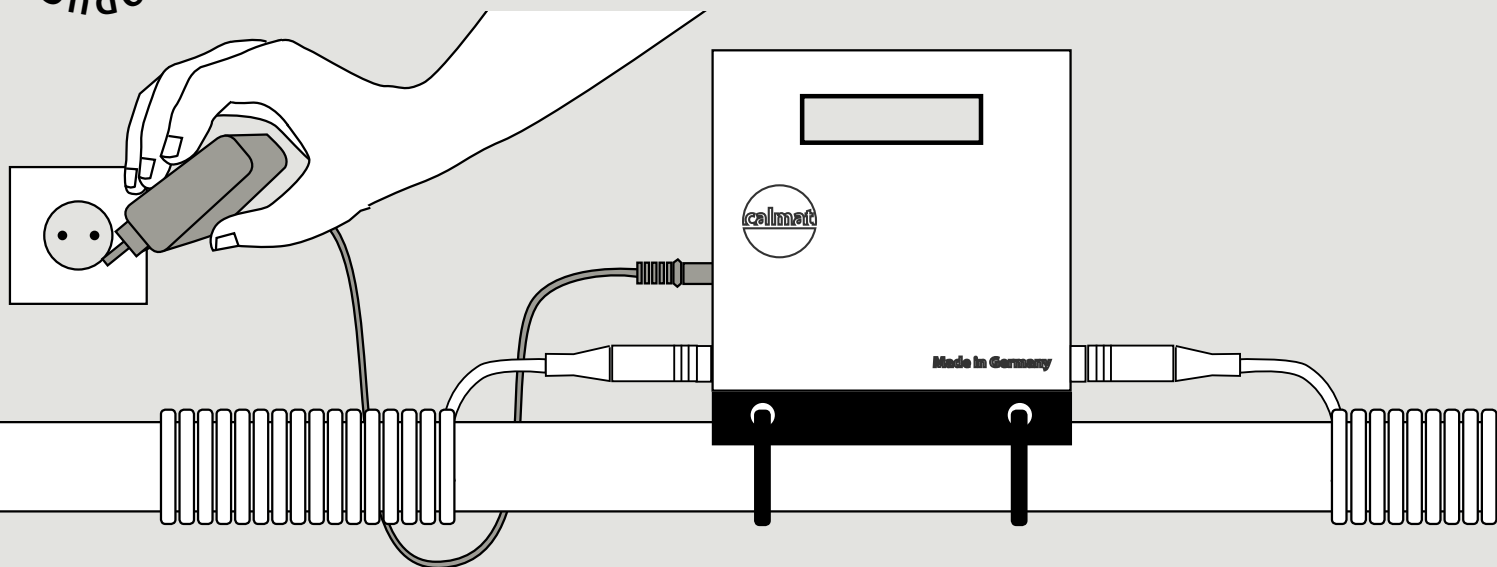

Trei pasi simpli pentru a-ti instala singur echipamentul – nu este necesara demontarea sistemului de tevi

1 Pozitioneaza calmat® pe teava

2 Infasoara cablul de impuls in jurul tevii

3 Conecteaza-l la priza

calmat® – Produsul pe care ti-l poti instala singur – Pentru consumatori casnici

Fara operatii de intretinere

Economic si usor de utilizat – Nu sunt necesare
substante chimice sau sare

Se preteaza pentru orice fel de material de
teava/conducta

Program de utilizare simplu in 8 limbi
diferite

Tehnologie cu impulsuri de 24-V patent CWT

Certificate de calitate ale produsului

Proiectat si fabricat in Germania

3 ani de garantie internationala

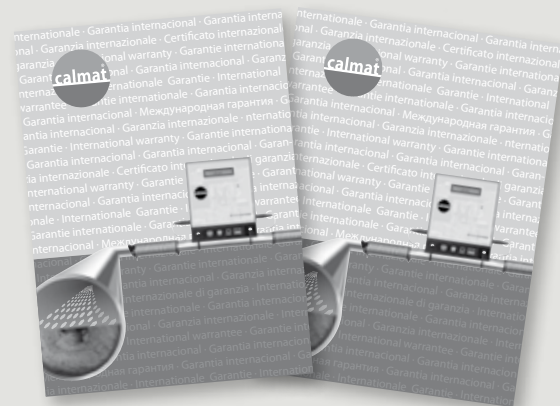

Consum de electricitate foarte redus

Manual de instructiuni extins, in 8 limbi

Card de garantie
